

PSA: <https://www.youtube.com/watch?v=JRTkiciQlzc>

When I put my trash from lunch in my bag, I got a weird look from my friend. She said “I can throw that away for you.” I kindly declined and she gave me a weird look. I explained to her that I was doing an experiment to see how much waste I produce in 24 hours. She said that it was a cool idea and that she thought I was just being weird by putting trash in a bag, but that it made a lot more sense after I had explained. I will admit, it is kind of weird to put my waste in a bag and carry it around all day but it’s made me become wary about how much waste I actually produce and how it contributes to pollution.

I am sharing this video with family and friends and putting it on my website to spread even more awareness. (greenplanethappyplanet.weebly.com if you’re interested - it’s kind of a psa because I’ve informed quite a bit of people about the environment with it!) I hope they will share the video to spread awareness even further.

A screenshot of a Facebook post by Molly Reynolds. The post includes a text message, a YouTube video thumbnail, and interaction buttons. The text message says: "Hi guys! I've created my own video about the environment. You should definitely watch it and share it if you'd like! It's a fun video and it was fun to make. Thank you! <https://www.youtube.com/watch?v=JRTkiciQlzc> Turning Green Klean Kanteen ChicoBag #PGC2018". The video thumbnail shows a man in a dark jacket and beanie, with the title "Limiting Waste In America" and a description: "How many pounds of trash does the average American produce everyday? America alone produces billions of pounds of waste every single...". Below the video are buttons for "Like", "Comment", and "Share". At the bottom is a comment input field with the placeholder text "Write a comment..." and icons for emojis, photos, GIFs, and stickers.
