

## **Waste Crisis**

*The nature that has been brimming with benevolence;  
Still being reciprocated by us with utter lack of  
vigilance.*

*Fire, water, **air**, earth, space, the five great  
elements;*

*And all the glorious bounties that have been eminent.  
All covered with the heap of garbage we generate;  
Exploiting all resources wherever humans can  
penetrate.*

*No control on the waste we produce;  
Peak time to implement the 3R' s- recycle, reuse,  
reduce.*

*Let's reignite the latent spark within each one of  
us;*

*Rethink of the ways to abstain ourselves from  
creating trash and fuss.*

*Pressing demand to manage waste crisis,  
Else we'll be the one paying detrimental prices.*

### *Public Service Announcement*

*On the day 3 of project green challenge we were given the task of doing a public service announcement about waste crises in our college.*

*To do that, we did following things in our campus.*

- 1. Made a video about the growing waste that we are generating every day.*
- 2. Prepared a poem about the same and made people aware about it.*
- 3. Hung flyers and posters around the college on the notice board.*
- 4. Shared the video on social media platforms like Whatsapp and Instagram.*
- 5. Every Saturday is an activity day in our institution where all activities are based on a precise theme and we requested the management to have 'waste management' as the theme for the upcoming Saturday.*
