Political leader: Claudia Sheinbaum

Party: Morena

Office that she holds: Elected chief of governance in Mexico City and former mayoress of Tlalpan

Two policy issues that she talked about during her campaign? Where does she stand on these issues?

Pollution and security were the two mayor issues that she talked about during her campaign. She expressed being against both issues and proposed plans to attack them,

What is **your** position on each and why do these issues matter to you?

I am against pollution since I consider that all citizens deserve to live in a clean environment. In addition, with no pollution the flora and fauna of the region would be safe and species would not be endangered due to pollution reasons.

The issue of security is very important in Mexico City, where Sheinbaum will govern, since most of Mexicans have been affected by the city not being safe enough. I am opposed to the city not being safe and as the rest of the people, hope that this matter can be solved.

Political leader: Andres Manuel Lopez Obrador

Party: Morena

Office that she holds: Elected president

Two policy issues that he talked about during his campaign? Where does he stand on these issues?

Politicians earning more money than what they should and poverty were the main issues that he mentioned during his campaign. He stands against both issues and during his campaign he proposed plans to fight them.

What is **your** position on each and why do these issues matter to you?

I am against politicians earning such huge amounts of money because in my country it is well known that most of them are corrupt and do not take actions to ensure that people are living in good conditions or that their rights are being met.

For this reason I am on favor that they stop earning that much and that the money saved is invested in things that will benefit the citizens.

I am also against poverty since I consider very important that people have access to all kinds of services like water, light, education and even Internet since they all are part of their human rights. I consider that it is necessary to take the right actions to end this issue as soon as possible in order to provide good livings to all citizens and future generations.
