

Day 14, Greener

We have documented this article in pictures!

The place we picked to travel for our project green challenge is Van Vihar, Bhopal, India. Van Vihar National Park is a national park in central India. It is located in Bhopal, the capital city of Madhya Pradesh. Declared a national park in 1979, it covers an area of about 4.45 km².

To travel from our Home to Van Vihar National Park, we choose the City Bus instead of Own vehicles to reduce the pollution and to save Resources.

To make our travel inside Van Vihar National Park Eco-Friendly, we arranged Bicycles for our group on rent to explore the national park.

The Primary Snack we took with us is Roasted Chick Peas. It is a traditional Indian snack. Cheap, Full of Nutrients, Tasty and Organic. The best thing about it is it can be carried on recycled Newspaper easily. This is the best thing one can get while travelling because of its flavours of Spices in it.

The other two things kept as a snack for trip are Atta(wheat) cookies and Jaggery and Peanuts bar. Both of these foods are organic as well as tasty. The main aim of packing snacks is that they are made from organic products/Ingredients and they have low carbon Footprints. All the things we kept as snacks for our trip are those which can be easily be made at home.

The water bottle we used is also a Steel Bottle instead of the Plastic ones. Neither any plastic bottle was carried along the trip and nor bought there. The trip was complete Plastic Free for snacks and water bottles.

Well the waste we generated was properly taken care off. If no dustbin was nearby it was kept in an compartment in our Bags until a dustbin is found. The waste was properly categorized and thrown into 2 seperate dustbins that are Wet Waste and Dry Waste.
