### Recipe:

- **2 – 1 Quart (1 L) Spray Bottles** – good heavy-duty ones
- **1 Shaker Jar with holes in the lid**, such as an old spice jar or a mason jar
- **¼ c. (60 mL) Dr. Bronner's Pure-Castile Soap** – your favorite scent
- **2 c. White Vinegar**
- **1 qt. + 2 c. (1 L + 500 mL) Water** – I use reverse osmosis water because I have it handy, and it makes for a crystal clear solution, but tap water is fine.
- **2 c. (500 g) Baking Soda** – bicarbonate of soda
- **Essential Oils** (optional) **20 drops/recipe** – tea tree for an extra cleaning punch, and any other essential oil that makes you happy
- **Microfiber Cloths** – often sold in the auto care section

I made a cleaner using this recipe and used it in my bathroom, it worked really well and cleaned the space. It smelled nice because I use a mint scent which is one of my favorites, and the scent really came out. The products that I used in the past smelled more like chemical, or commercial cleaning products and I liked this one better.
