School: MAST@FIU

1. Zero Waste: 95% - MAST @ FIU is performing very well when it comes to handling zero waste, there are currently around 3 clubs and an entire class dedicated to turning the school into a waste-free zone. One way to improve though is for the school to develop a program that will allow for either no plastic waste to be produced from lunch or a program that allows for reusable trays and utensils for lunch to not produce any waste.
2. Food Waste: 80% - MAST @ FIU is performing alright when it comes to handling food waste, but it can be doing better as the school currently produces more food than it serves its students, causing many forms of food to be thrown away and wasted. One way to improve is to introduce a new campus initiative that influences students to both not order food that they would eat and to not throw away food given the opportunity, as well as introducing a program that allows for food that has not been ordered to be either reused for the next day if it does not spoil, or to donate it to other places that can receive such food.
3. Climate Justice: 100% - MAST @ FIU is performing amazing when it comes to handling Climate Justice, as there are currently several clubs, classes, AP Classes, programs, campus initiatives, and programs put into effect to think about ideas and solution for climate justice, as well as climate responsibility. Where there is not much room for improvement on climate justice other than to maintain that rigor in the school.
4. Footprint: 90% - MAST @ FIU is performing very well when it comes to their environmental footprint, as they made a very environmentally friendly building with energy and water efficiency for the function of supporting hundreds of students daily. One way the school can improvise is to possibly install smarter and more water-efficient toilets and sinks that allow for more sustainable use of resources.
5. Wellness: 85% - MAST @ FIU is performing alright when it comes to student wellness, as it provides both counselors and wellness clubs that allow for mental health to be freely and openly discussed with help at every corner. One way it could be improved is through the form of a campus initiative to encourage students to understand that the competitive and rigorous stature of the school does not mean you would have to face it alone, and to inform more students about the help they can receive.

mastfiuseacorps.challenges Zero Waste: 95% Food Waste: 80% Climate Justice: 100% Footprint: 90% Wellness: 85% Overall, MAST @ FIU does exceptionally well when it regards topics that are beneficial to the environment, energy usage, and mental health as it takes many factors such as class rigor to waste management in mind, giving this school a grade of 90% or an A-minus! Which is a very great job such work. #pgc2021
